

ePAN® Bun Pans

Chicago Metallic ePAN® Bun Pans are manufactured from high-tensile strength aluminized steel which produces a pan that is thinner and lighter, yet substantially stronger than traditional pans. Using less metal also means ePAN Bun Pans heat faster and cool more quickly.

Energy Efficient

ePAN uses a thinner gauge but higher tensile strength aluminized steel that allows the pan to heat up and cool down faster, resulting in reduced energy costs.

Environmentally Sensible

ePAN requires a substantially lower volume of raw material resulting in less resource consumption.

Ergonomically Sound

The lighter weight ePAN – weighing up to 25% less than a traditional pan – makes handling more manageable and less stressful for employees.

Extended Pan Life

The high-tensile strength of ePAN's aluminized steel minimizes the potential for pan damage.

Item #	In Stock	Coating	Description	Arrangement	Overall Size (in)
Hamburger Bun Pans					
42495		Glazed	26 gauge*, wire in rim	4 rows of 6	17¾ x 25¾ x 1½
42425		Glazed	26 gauge*, wire in rim	3 rows of 5	17 ¹¹ / ₁₆ x 25 ¹¹ / ₁₆ x 1 ⁹ / ₃₂
42445		Glazed	26 gauge*, wire in rim	6 clusters of 4	17 ¹¹ / ₁₆ x 25 ¹¹ / ₁₆ x 1 ⁵ / ₈
Hot Dog Bun Pans					
42435		Glazed	22 gauge*, wire in rim	3 rows of 6	17 ¹¹ / ₁₆ x 25 ¹¹ / ₁₆ x 1 ⁵ / ₈
52435		DuraShield	22 gauge*, wire in rim	3 rows of 6	17 ¹¹ / ₁₆ x 25 ¹¹ / ₁₆ x 1 ⁵ / ₈

BUNDY BAKING SOLUTIONS:

-  Baking Pans
-  Pan Coatings & Refurbishment
-  Equipment & Services

Ultimate Coatings

AMERICOAT® ePlus Silicone Glaze

AMERICOAT® ePlus is the world's leading silicone release coating.

- Longer-lasting performance
- Reduced pan oil and labor costs
- Increased durability
- Reduced food staining

DuraShield® Non-Stick Coating

DuraShield® fluoropolymer coating provides a guaranteed minimum of 3500 releases on most bun products.

- Virtually eliminates the use of oils
- Outstanding release characteristics
- Certified to be PFOA-free
- Easy to clean

 Made in USA with Global Materials
