

BĀKALON Diamond Grill Pan

The Chicago Metallic BĀKALON Diamond Grill Pan is designed to add grill marks to steak, chicken, or fish when cooked in conveyORIZED or conventional ovens. The pan is constructed of high-strength aluminum with a durable, hardcoat anodized surface that will not chip, peel, rust, or interact with food.

Durable

Through an electro-chemical process, our BĀKALON pan surfaces provide an ultra-hard and durable surface that resists abrasion and corrosion. In fact, the surface hardness of our BĀKALON pans is second only to diamonds, which makes it one of the most durable pans you can buy.

Efficient

Increase the utility of your conveyor oven to provide “grilled” vegetables and proteins like steak, chicken, and fish.

Healthy

The pan’s indentations capture grease and keep it away from proteins, creating a healthier product.
